

WHAT'S ON IN ART?

WELCOME BACK!

It was so wonderful to hear about all the creativity that happened over the holidays. So many students have shared with us that they used plastics and other recycled objects to create artworks.

During the break I created an octopus garden using cardboard tubes with my kids. Reminding us of the link into how rubbish gets into our oceans. It is never too young to start the discussion about looking after the world around us and a great way is through creating art.

Term 2 Topics & Focus

We have some really fun projects planned for Term 2. The Topic for the **Prep to 2** year levels are..

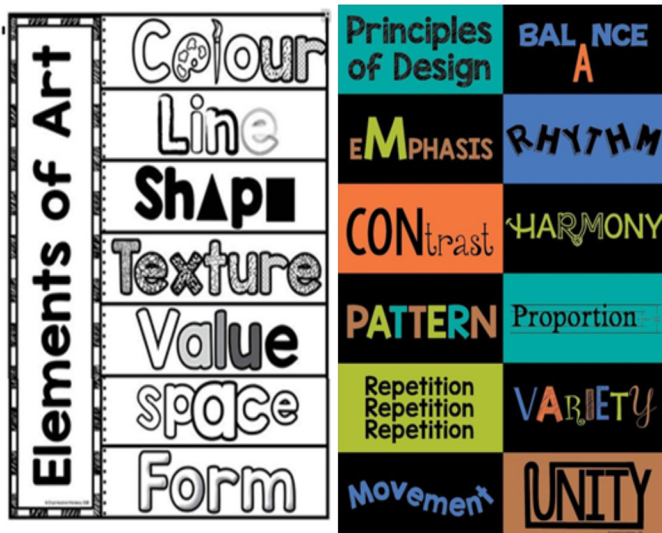

Elements of Art & Print Making

There are seven Elements of Art. The students will be exposed to all of these and focus on several when getting creative.

The **3 to 6** year levels are focusing on the...

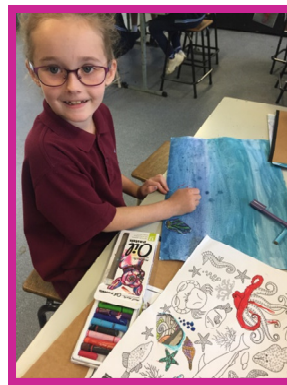

Principals of Design & Print Making

We use the Elements of Art and Principals of Design in our work already but by having a greater understanding of these, helps us to become even better artists. When we create art we can think more about the where, why and how when using techniques for example the placement of colour, objects, lines, shading and layout of our creations.

Meanwhile...students are putting the finishing touches from their Term 1 artworks. Getting them completed and Art show ready.

It has been wonderful to watch all the lower year levels embrace the ARTIST attribute '**Turn a Mistake into a Masterpiece**'. We are learning and growing every week and these mistakes help us learn from one another. Mistakes create new ideas and improvements and this is when a natural artistic flare can really shine!

The Grade 2's creating their final masterpiece for the Art Show (Open Night) coming up later in Term 2.

Congratulations to our weekly ART AWARD recipients so far in 2019. Some weeks Mrs. Bailey and myself have a very hard time choosing.
