

WHAT'S ON IN ART?

Term 4 - Digital Art

In Term 4 the children are learning about Digital Art. **Digital Art** is an artistic work or practice that uses **digital technology** as part of the creative or presentation process. The children will be creating artworks using the iPads, laptops, digital art websites, animated story apps and Spheros.

Different types of Digital Art include: Vector Drawing, Digital Photography, Digital Photography Photo Manipulation, Digital Painting, 3D Modelling, Website Design, Computer Generated Images, Animation, Games, Interactive Art, Fractal Art, Mixed Media, Pixel Art and many more.

The children are loving working with technology to create their artworks thus far and I can't wait to see the finished products.

Term 4 Art Projects

Please ask your child about their Digital Art projects that they have begun this term.

Prep: Pixel Art

1/2: Digitally designed robots using Pixel Art and Animated Stories

3/4: Claymation

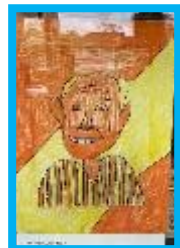

The Archibald Prize

A massive thanks to the students and their families that attended The Archibald Prize exhibition at Tarra Warra Estate. We were so thrilled to share our passion for portraiture and WOW the exhibition did not disappoint. To hear the children critiquing the artworks and choosing their favourites was wonderful.

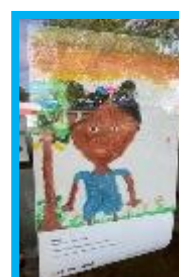

Not the Archies Portraiture Competition

Congratulations to the Wandin North students who were chosen to create portraits to enter into the Not the Archies competition. The children blew us away with their creativity and attention to detail. I was more than PROUD when I saw them all on display on the weekend. You can view these artworks that are currently on display in the shop windows of both

and Yarra streets.
